

Bob Boisvert, Ottawa

February 10, 2015

presented at the
QualiWare North America User Conference

Bob Boisvert

- Consultant working with CloseReach
- Involved with QualiWare since 2011
- Instructor, Developer, Process Architect
- QW work for: DND, QualiWare, Alcatel Lucent, Bossard, CBSA

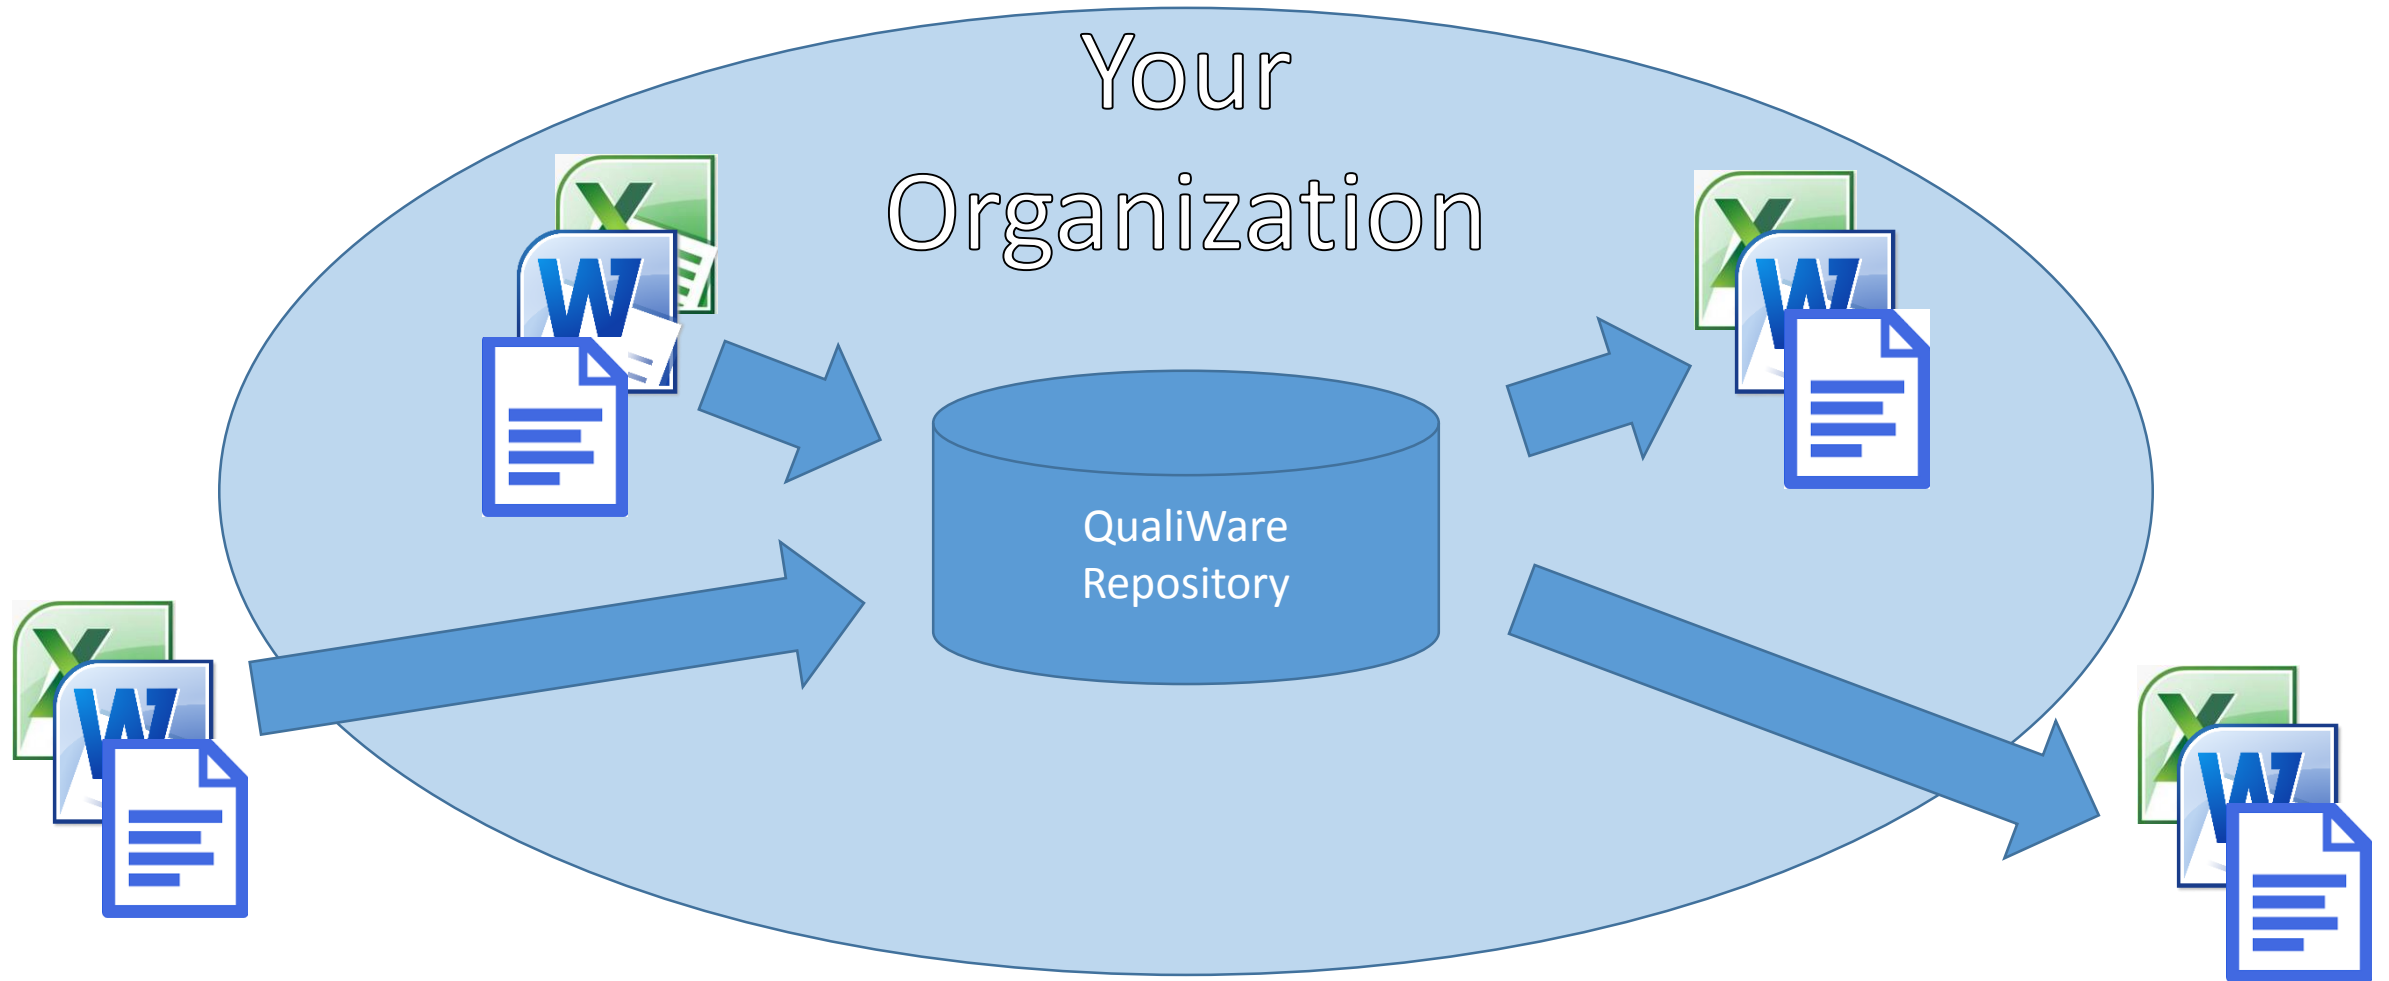

"Yes we can!"

Agenda:

- Architecture Data Transformation
- Qualiware Key-macros

Architecture Data Transformation

Transforming Architecture Data

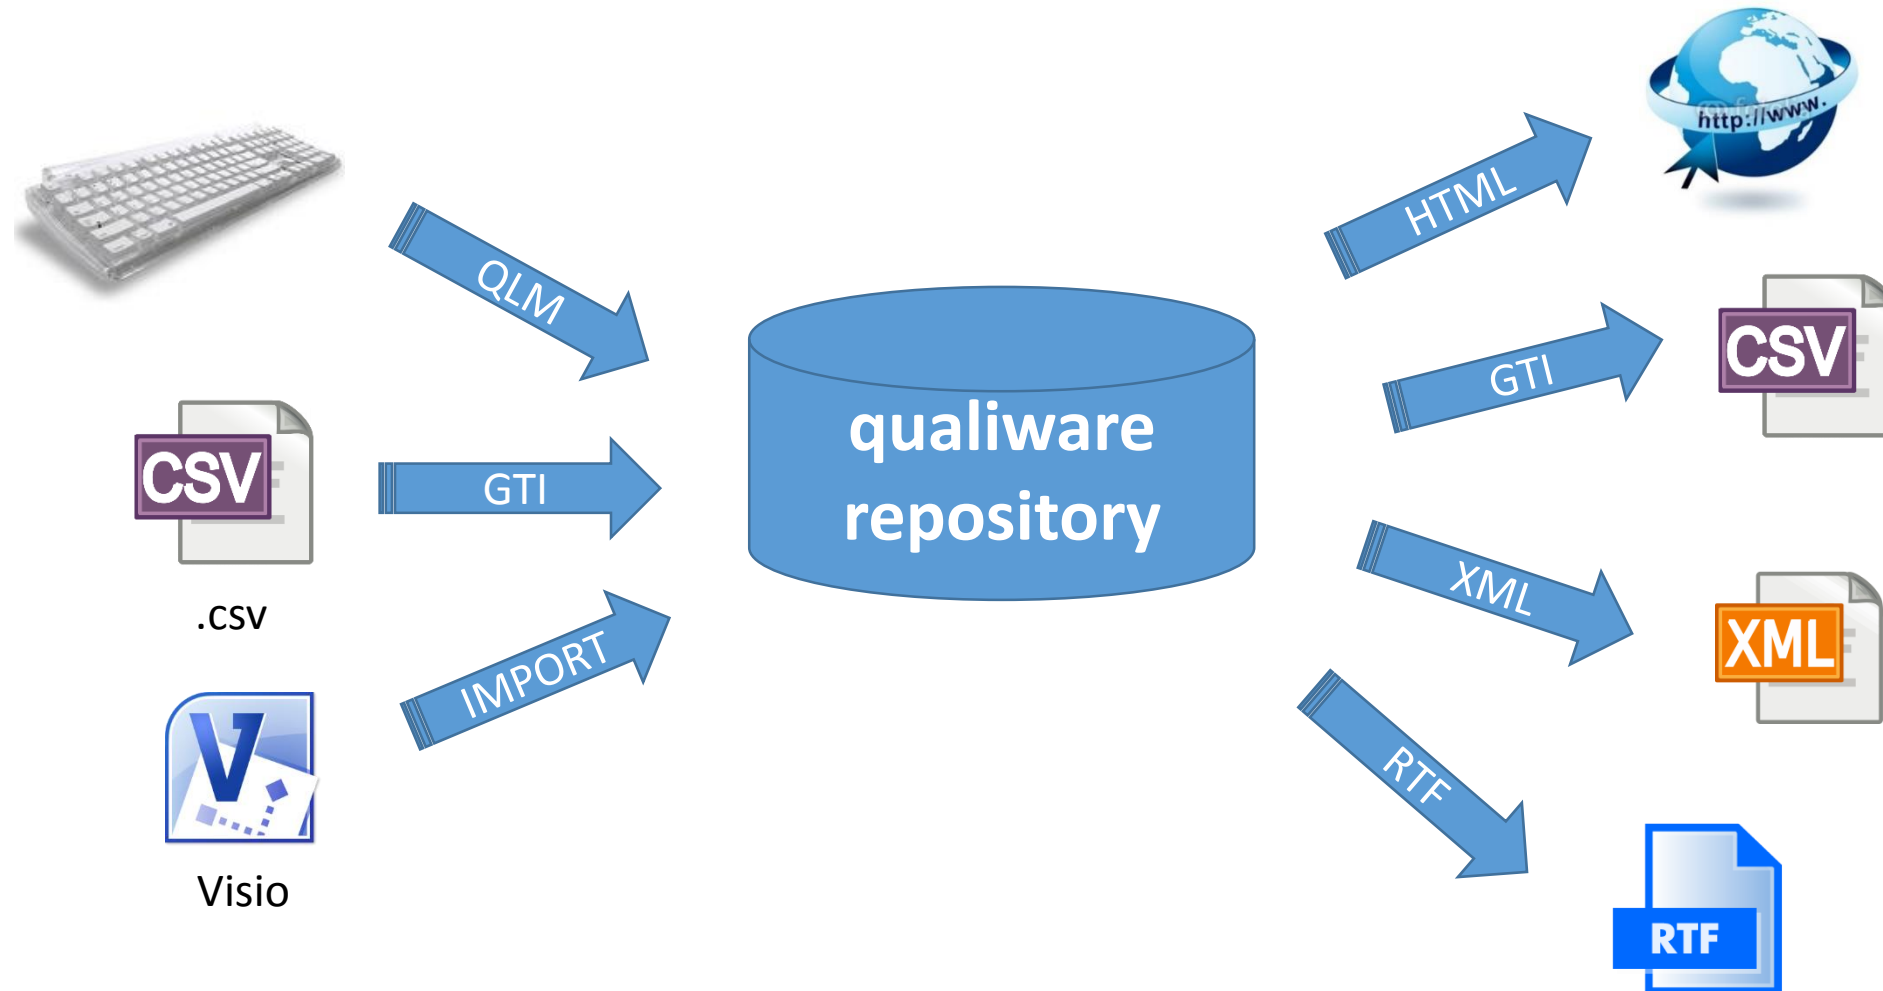

Exploration:

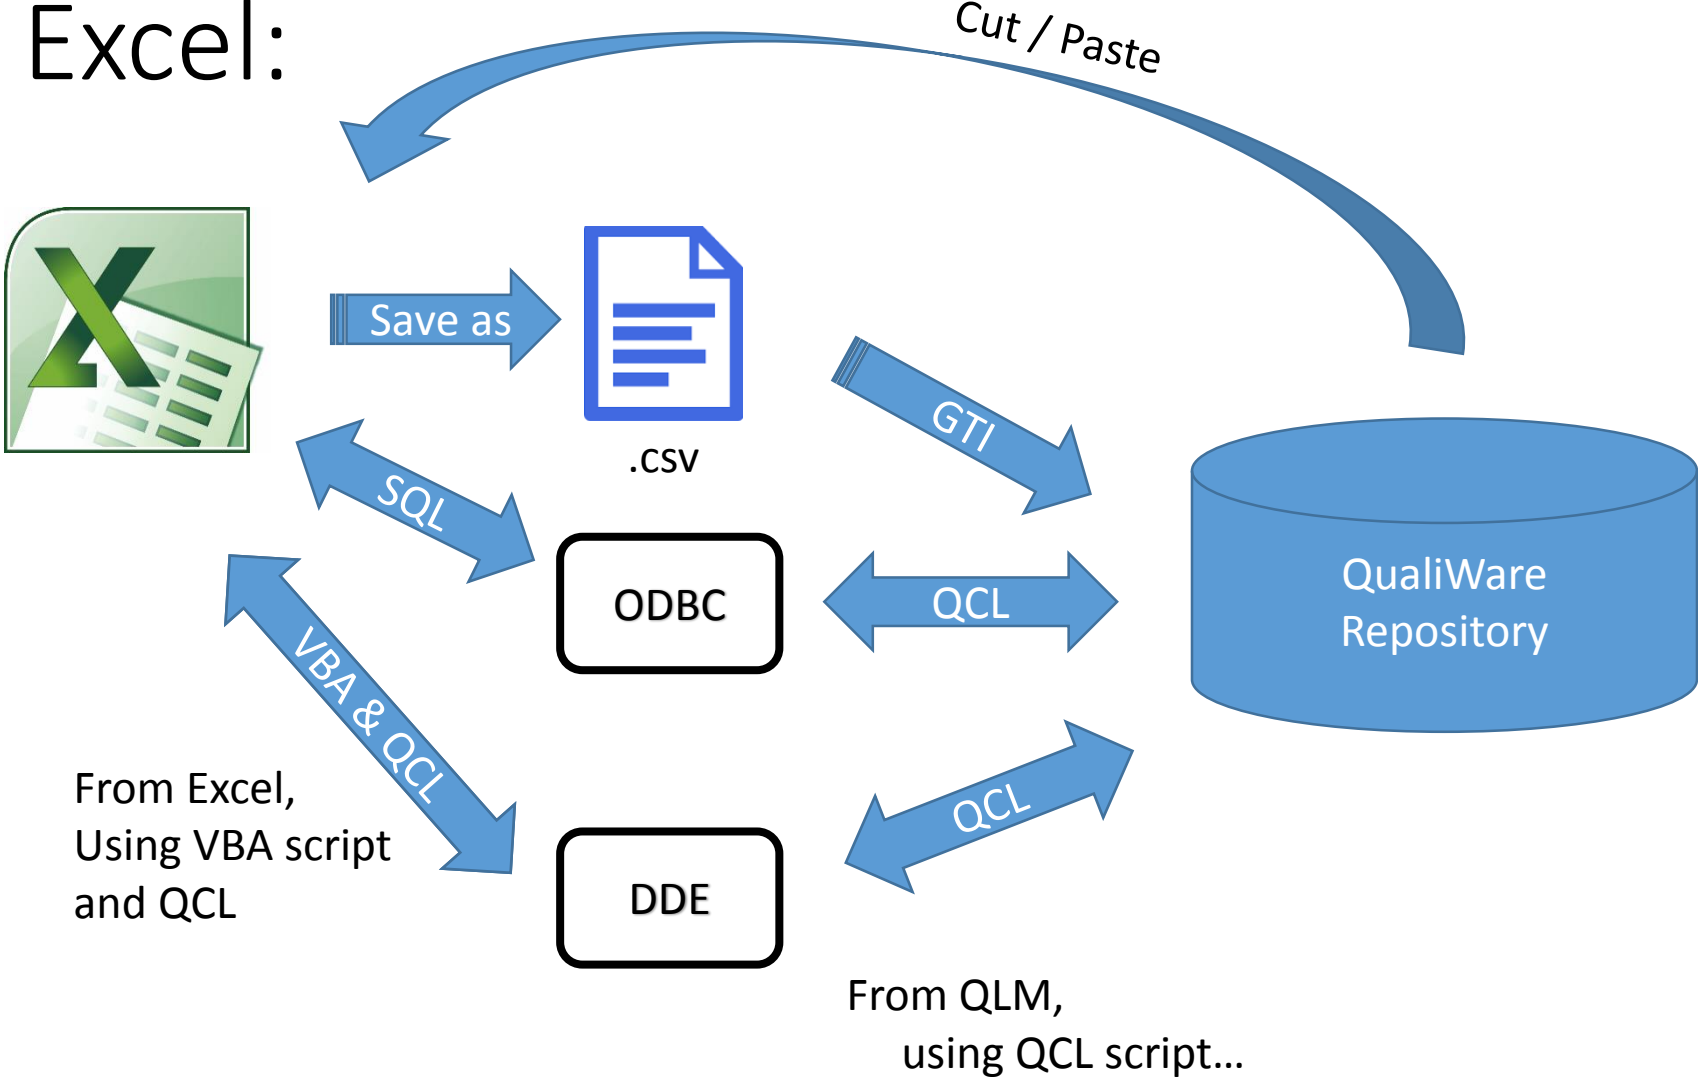

What follows is simply an attempt to uncover ways to do data transformation with QW

- Input into QualiWare
- Output from QualiWare
- Interaction with other software

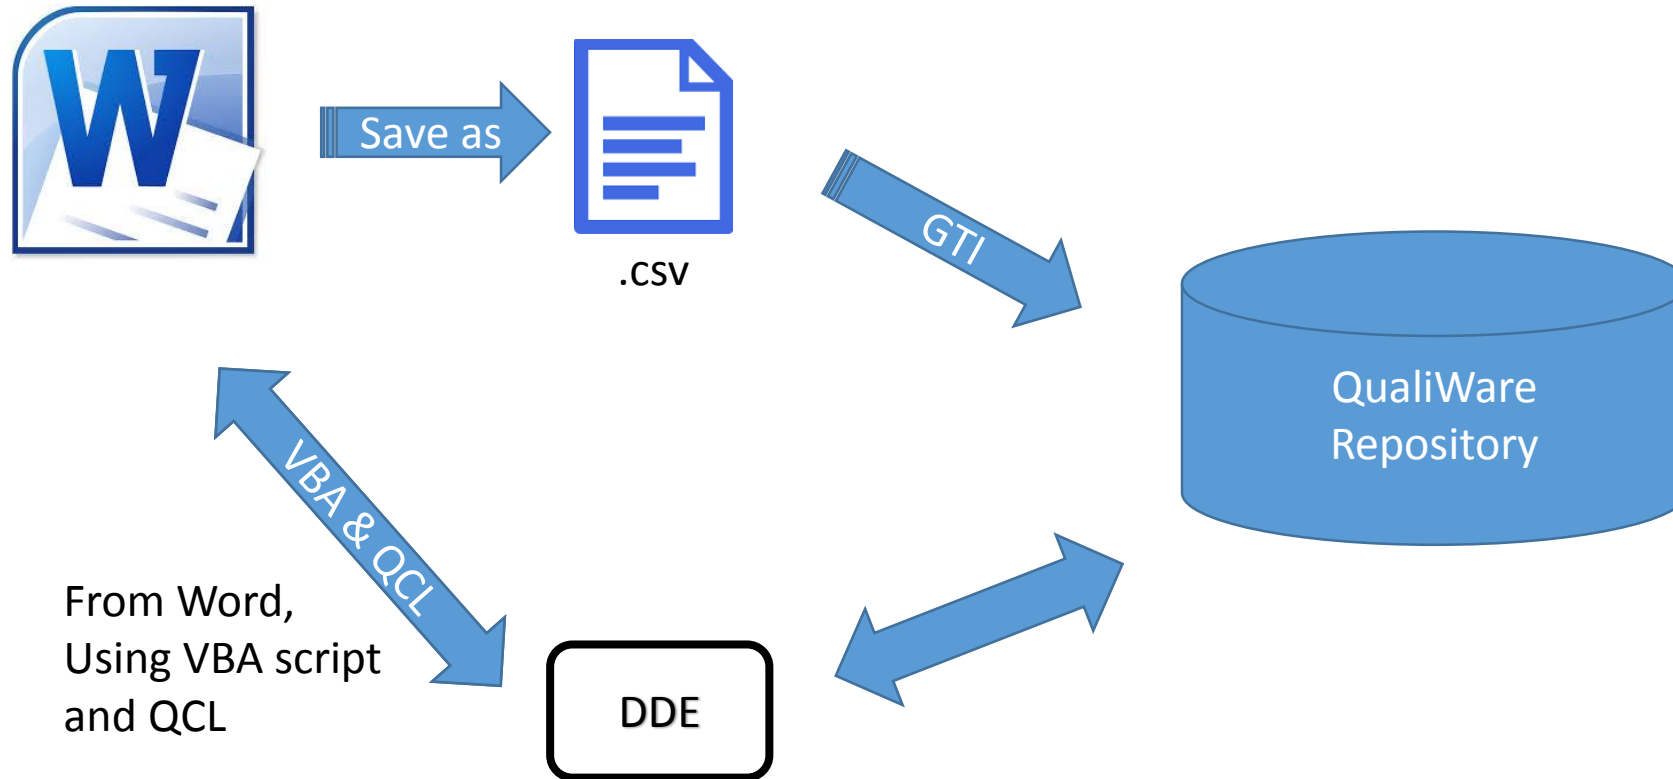

QLM out of the box, at first glance:

MS Excel:

MS Word ?

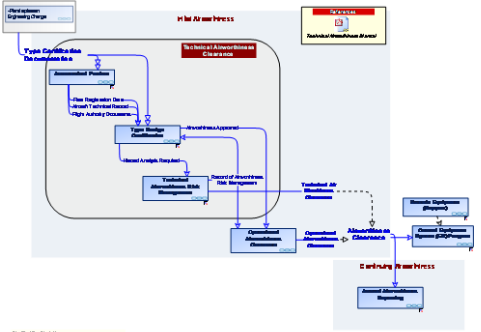

Practical case:

- DND has ~1,000 diagrams developed in MEGA
- Small team took eight years to develop
- Did not want to lose all that work!

Example: MEGA To QualiWare

x,y coordinates
symbols
connectors

Models

x,y coordinates
symbols
connectors
... and links

MEGA to Qualiware extraction

Load background tables: Load the MEGA objects that are to be mapped to QualiWare. This is a complex load of these tables. This includes Definition, External reference, IT Service, Subject Area, Functionality, OrgUnit, Condition, Synchronization, Organizational Process, Team, Business Function, Profiled Address and Business Process. This takes about 15 minutes to run.

Get All Relationship data: This process extracts the associations that exist between the objects extracted above. This takes about 30 minutes to run, as it loops all possible and relevant associations. [View/Edit Relationships](#)

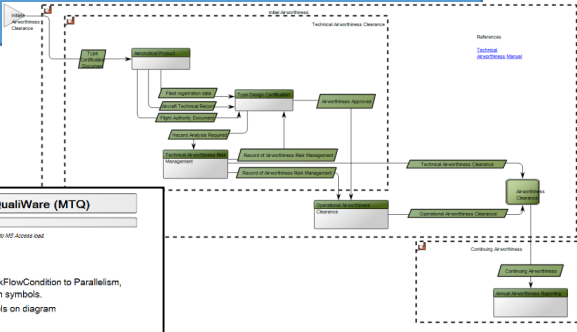

Use Extract list of diagrams: Use when the list of MEGA diagrams below is empty, or when you know that there are new or modified diagrams in the repository. This takes a minute or less to load.

MEGA Diagram name:

Diagrams to Extract:

Diagramname	
...	

Records: 14 of 1 of 1. Search

MEGA to QualiWare (MTQ)

1 Load Diagrams

2 Apply logic to change WorkflowCondition to Parallelism, Junction or Synchronization symbols. Load links between symbols on diagram.

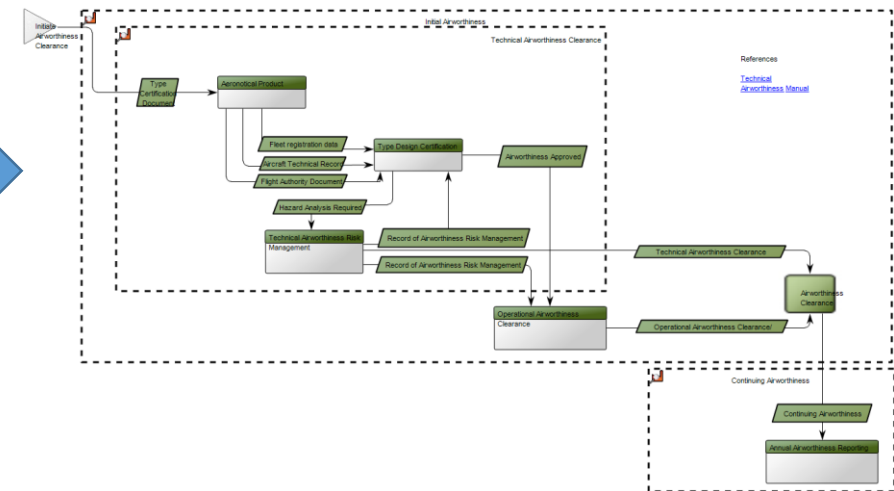

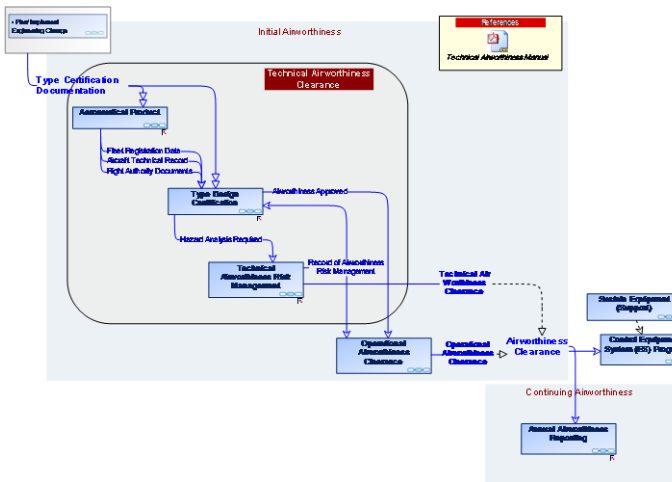

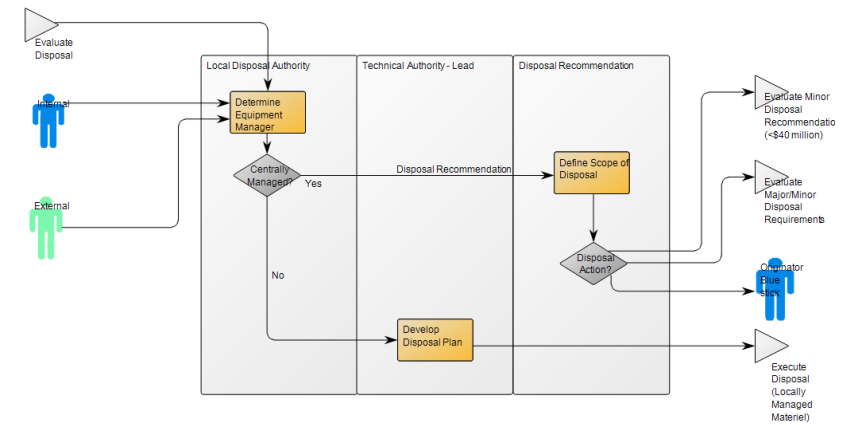

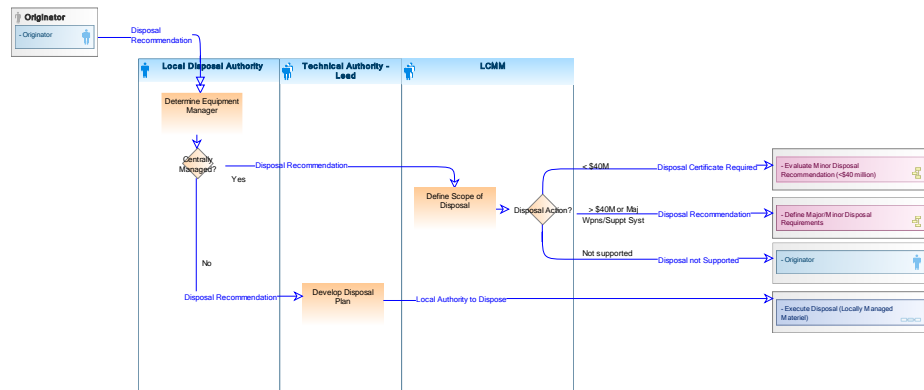

3 Apply associations between objects in repository

4 Load SubjectArea and Definitions

5 Guess Definitions

Note: Double click on the buttons to execute the MTQ code. Code was written to be run in the order presented above. Some of the code will run for quite a while.

MEGA to QualiWare

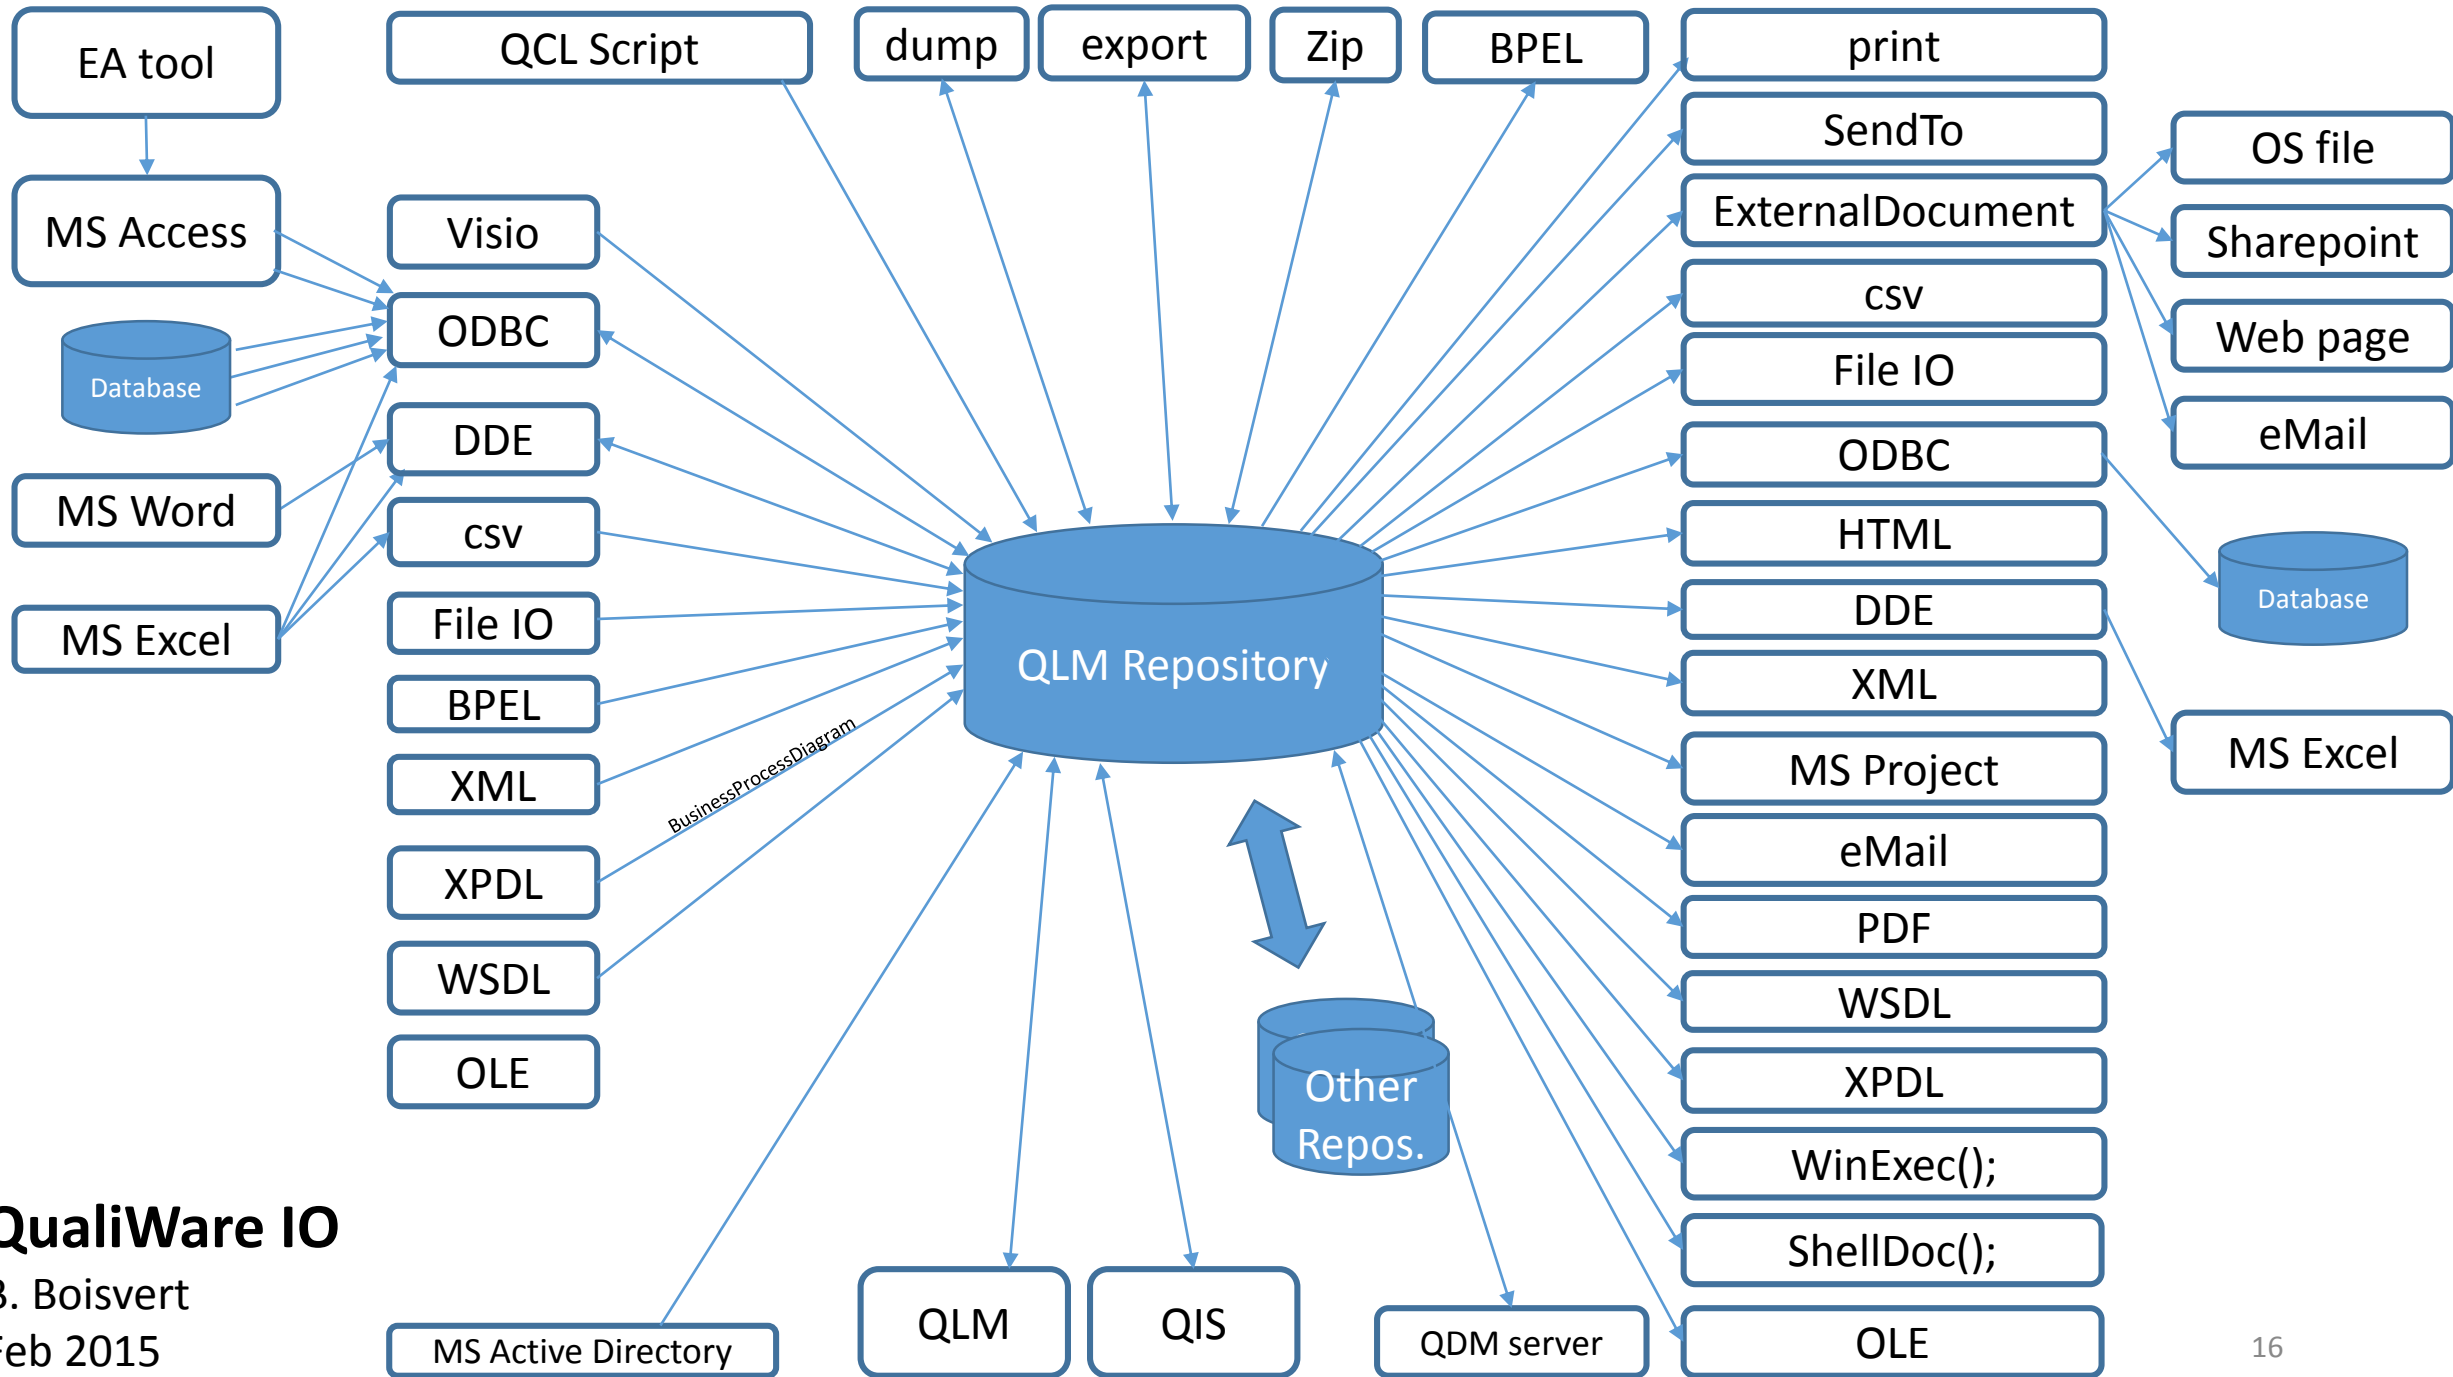

Modified by local engineer
Data Modified @ 2017-08-22 10:21:58:42

Also investigated:

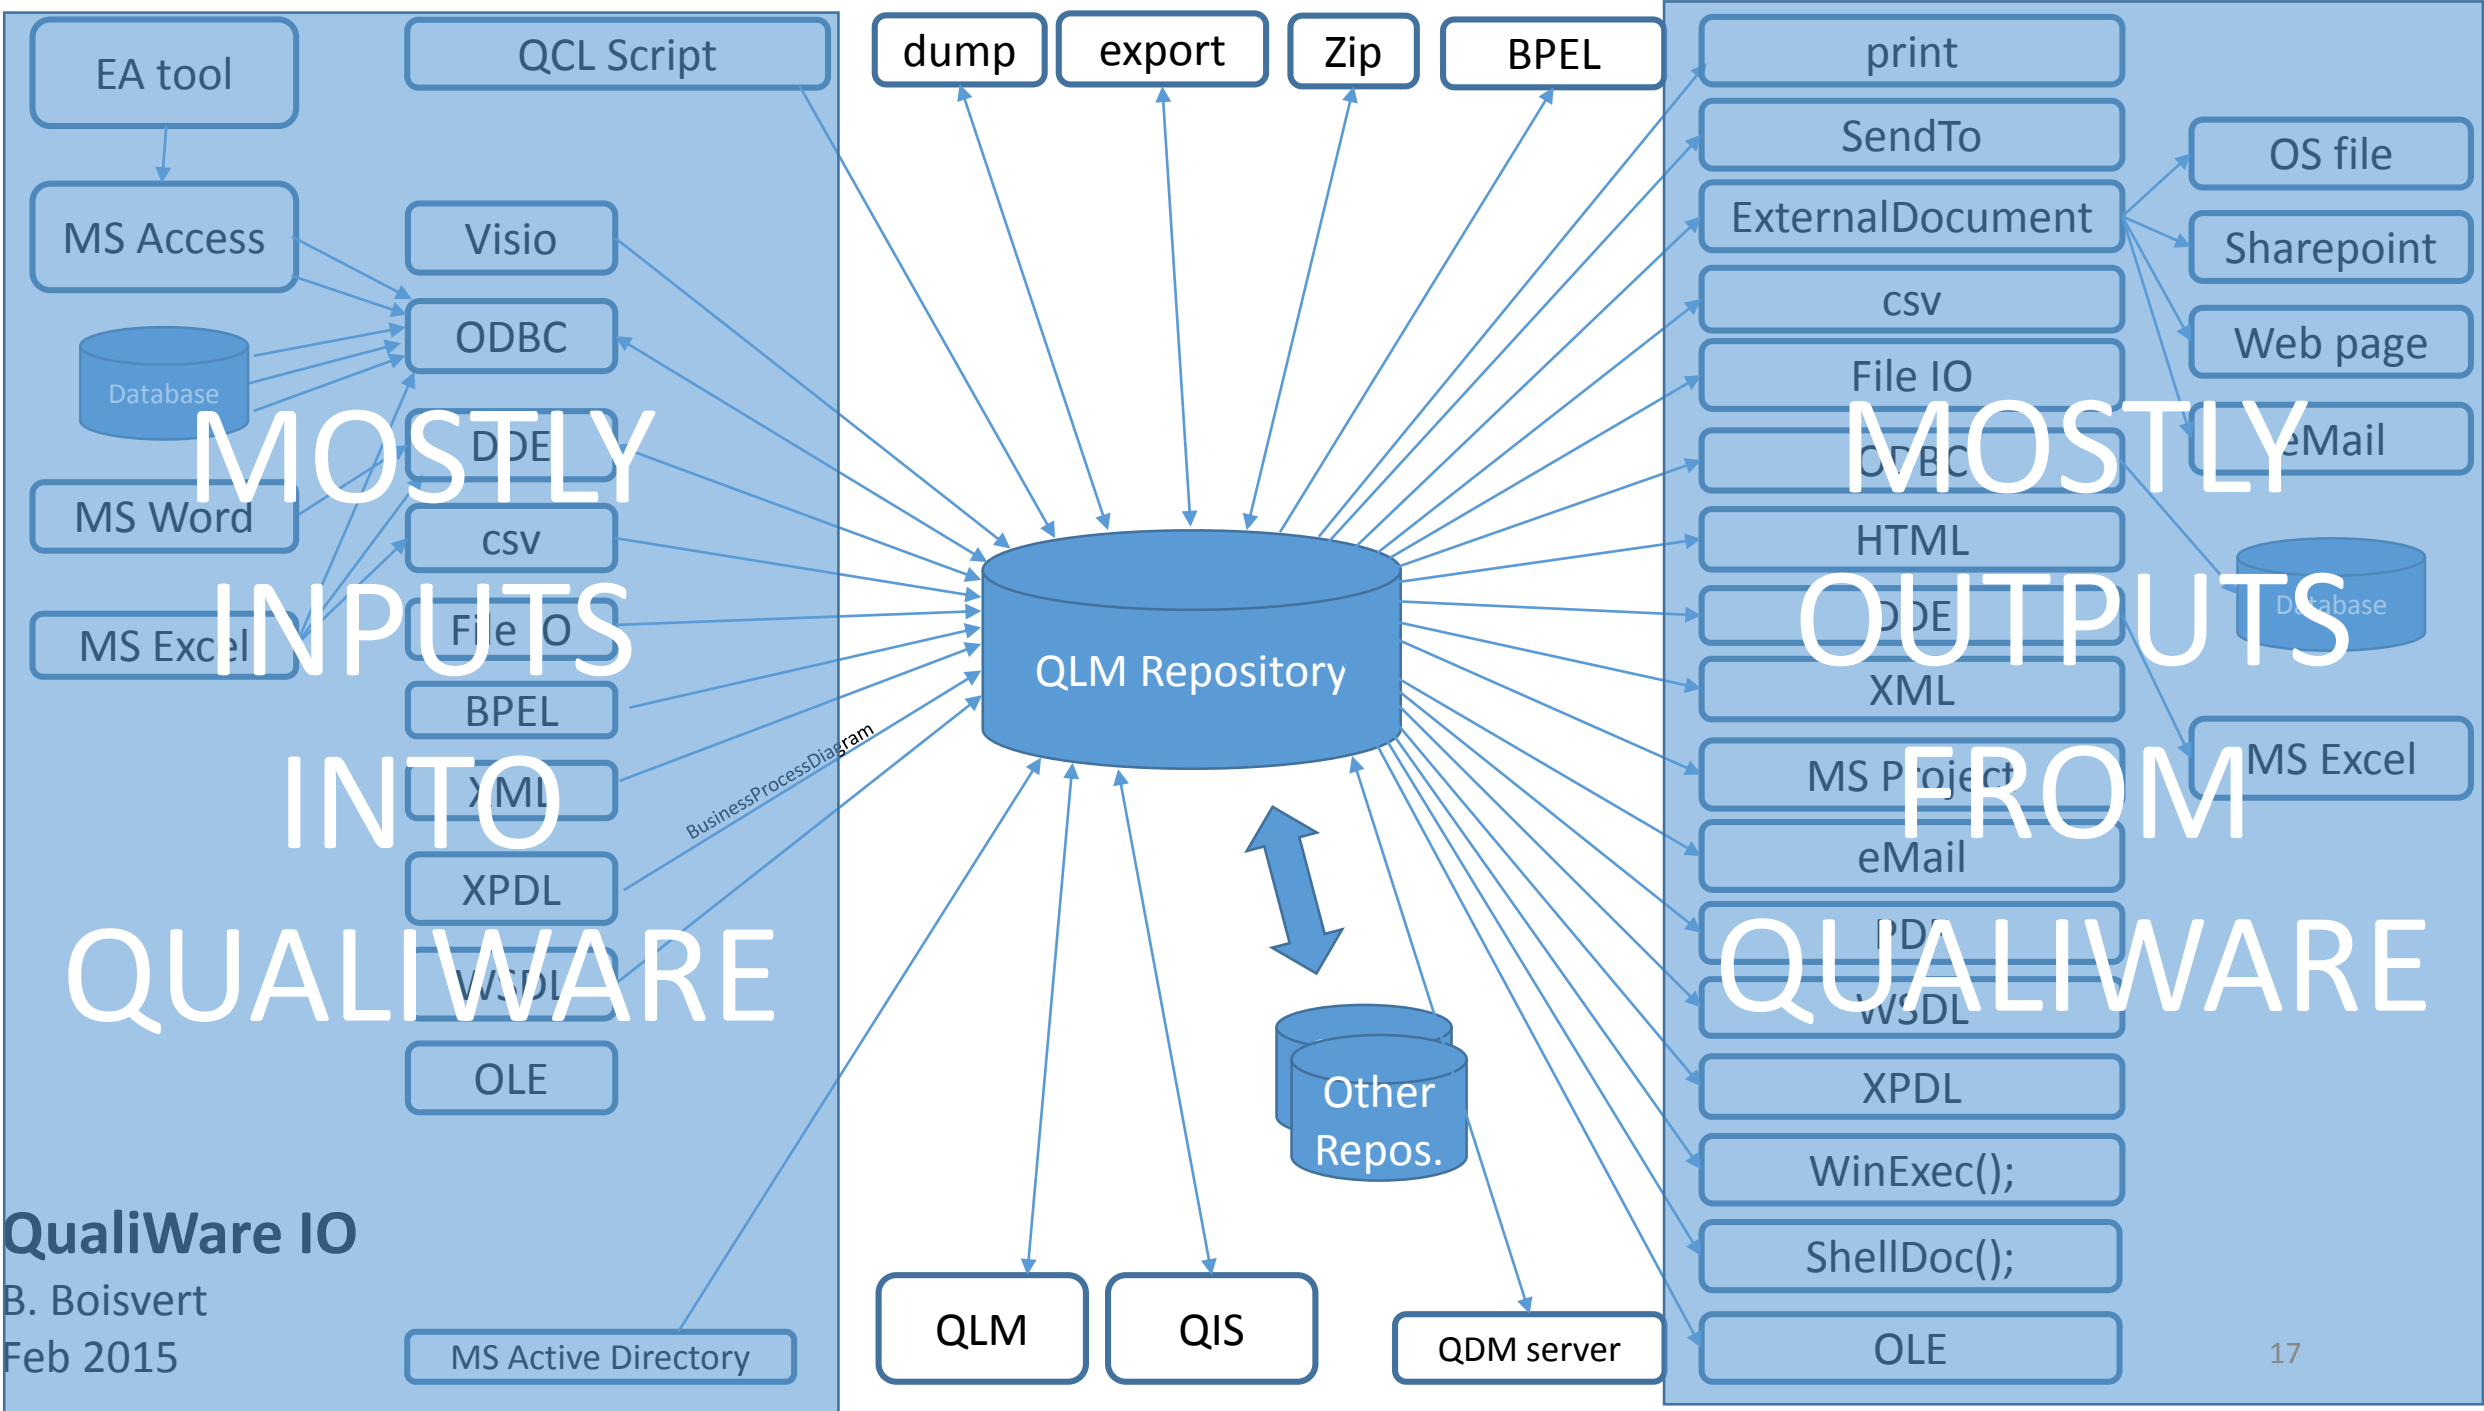

- Tool menus
- Help system
- QLM QCL code

C:\ drive, or network drive

QualiWare IO

B. Boisvert
Feb 2015

Features of previous diagram:

- Some are QLM features in the GUI
- Others require scripting (QCL, ...)
- Probably more possibilities

And more...

- Oracle
- SQL Server
- DB2
- WebDAV
- ...

What next:

- Identify your IO needs
- Check Help system
- Discuss with QW specialists
- QCL ?

QLM Key Macros

Key Macros in QLM

- QLM is feature-rich
- Lots of shortcut keys to do things
- Context sensitive:
 - Diagram e.g. Ctrl+L – re-use
 - Text e.g. Ctrl+L - Hyperlink
 - Matrix
 - Dialog
 - Repository Explorer

GENERAL	
Close QLM session	Alt F4
Copy	Ctrl C
Cut	Ctrl X
Drag and Drop	Alt click drag
Help	F1
HTML generate	Ctrl H
Interrupt	Escape
Paste	Ctrl V
Print	Ctrl P
Redo	Ctrl Y
Select All	Ctrl A
Spell check	F6
Spell check language	Shift F6
Undo	Ctrl Z
DIAGRAM EDITOR	
Add/remove space in diagram	Ctrl Shift drag ← ↑ → ↓
Align selected objects	J
Align symbol size	S
Attributes of selected symbol	L
Delete symbol from diagram	Delete
Show selected symbols	Shift D
Export	Ctrl E
Find symbol current diagram	Ctrl F
Grid – show	Ctrl G
Object Editor open	Enter or B
Move selection	← ↑ → ↓ (Shift to move faster)
Recently opened diagram list	Shift B
Refresh screen	F5
Rename object	F2
Reuse object	Ctrl L
Select multiple symbols	Shift (hold & choose)
Select multiple symbols	CTRL (hold & choose)
Straighten connectors	Space
User information	Shift W
Zoom 100% print size	1
Zoom to see all objects	Shift Z
Zoom in	Ctrl Scroll mouse up

DIAGRAM EDITOR (continued)	
Zoom in	Shift .
Zoom out	Shift ,
Zoom selective	Z
TEXT EDITOR	
Bold	Ctrl B
Drawing insert	Ctrl D
Find text	Ctrl F
Find next	F3
Hyperlink insert	Ctrl L
Italic	Ctrl I
Normal font	Ctrl N
Table insert	Ctrl T
Text editor Open/Close	F8
Underline	Ctrl U
REPOSITORY EXPLORER	
Delete object(s) from Repository	Delete
Rename object	F2
Save Repository	Ctrl S
QualiWare Command Language	
Help QCL command syntax	F1
Multiple command line	Alt F5
Multiple command line, Run, Check, ...	Shift F5
Single command line	Ctrl F5
REVISIONS & LANGUAGE	
Previous revision	Alt 1
List revisions	Alt 2
Next revision	Alt 3
Default revision select	Alt 4
Language variant list	Alt 5
CUSTOM	
<p>Your Key-Macros here. Contact your QLM specialist for assistance.</p>	

Ideas for new key macros:

- change line colour
- change connector style (orthogonal, any angle)
- Create a specialized matrix from diagram content
- Add notes to a diagram, Post-It style
- ...
- Any repetitive set of actions

Thank you - Merci - Tak
