

Patch notes for QualiWare 6.6.4.24

Patch Notes

This document contains information about solved incidents related to the QualiWare platform – Release 6.6.4.24. Incidents are described as QualiWare Incidents (QWI).

QWI's are grouped in the following way:

- Performance
- Functionality
- Stability
- User interface

Please note that the following list of QWI's contains original titles provided by clients and ID supplied by QualiWare. This ensures traceability from the dialogue with the client to the registration and handling of the incident within QualiWare. Since some of the incidents originates from clients writing in their national language, the list may contain non-English words and sentences.

In case details are required please contact Service Delivery Manager at QualiWare claus.pedersen@qualiware.com.
