Patch notes for QualiWare 6.6.5

Introduction

This section contains patch information for QualiWare release 6.6.5.

The purpose of 6.6.5 can shortly be described:

- 6.6.5 contains bug fixes compared to 6.6.4
- 6.6.5 contains no new features.

The 6.6.5 patch is recommended to all in order in order to keep up with the newest release.

Those cases where a specific problem is identified, which has solved by the below incidents, a patch update is particularly recommended.

Closed QWI

The closed Incidents(INC)/Defects(DF) can be grouped in the following groups:

Performance
Functionality
Stability
User interface

Please note that details on each of the incidents/defects are not included in this document. The reason is that too many of those fixes are quite detailed in their context.

In case details are required please contact Service Delivery Manager at QualiWare claus.pedersen@qualiware.com.
