

# Patch notes for QualiWare 10.10.1

qualiware

## 1 Introduction

This document contains a list of defects fixed in Release 10.10. Defects fixed in 10.9 and beyond can be found on QualiWare Center of Excellence:

<https://coe.qualiware.com/resources/documentation/>

Each defect includes:

- The defect number, which provides a reference in number
- The defect title, which provides a reference in meaningful text
- The defect description, which will provide a short description explaining what problem has been solved.

If details are required, please contact QualiWare’s Service Delivery Manager at the following email: [Claus.Pedersen@QualiWare.com](mailto:Claus.Pedersen@QualiWare.com).

## 2 Defects patched in version 10.10.1

Here are the defects fixed in QualiWare version 10.10.1:

Defect	Title	Description
<b>DF-1237</b>	Left view/HTMLWebQuery shows data from all revisions instead of only Default revisions.	Added possibility to either see LinkedBy for default revision or all revisions. By default – only default revision data.
<b>DF-1281</b>	“My To-Do List” area and required action are empty in user query.	QualiWare Enterprise Publisher export updated with a fix.
<b>DF-1284</b>	QWM (QualiWare Web Modeler): Connection unintentionally reorganizes itself.	This was caused by a bug in the code, that has been fixed.
<b>DF-1285</b>	QWM: Labels aligned in boxes do not save properly.	A change has been implemented in the calculations behind object positioning, that fixes this.
<b>DF-1286</b>	Error in ChangeRequest object locking.	Caching of context in the event arguments that handles this, has been fixed.
<b>DF-1287</b>	“Generate PowerPoint” dashboard item does not work.	An error in the out-of-the-box implementation of this feature has been corrected, so it now works as expected.
<b>DF-1290</b>	Private Workspace banner covers the “profile” button if workspace name is too long.	A fix has been implemented so this no longer happens.
<b>DF-1293</b>	Cultural settings – binding is “too strict”.	This binding has been “loosened”, making it less strict.
<b>DF-1303</b>	Resizing browser window changes size of DashboardItems until page is refreshed.	Sizes of DashboardItems now adjust according to size of browser window.

<b>DF-1304</b>	Diagrams unreadable on Chrome version 141.0.7x and Edge version 141.0.3x.	Svg elements style updated to counteract this. Note: As of Chrome v 142.0.7x and Edge v 142.0.3x, diagrams are read normally again.
<b>DF-1310</b>	DashboardItems show title instead of name when clicking the plus icon.	This has now been corrected to show name as expected.
<b>DF-1312</b>	Quick Search: "Search by owner" is always there, cannot be removed – even by admin.	This has been changed so it can be configured as desired.
<b>DF-1313</b>	Quick Search: HasResponsible/Owner doesn't work for InformationSystems.	This now searches correctly for Responsibles and Owners on InformationSystems.
<b>DF-1349</b>	Performance degradation on 10.10, when enabling QualiChat.	A correction has been made to the QualiChat handler.

### 3 Defects patched in version 10.10.

Here are the defects fixed in QualiWare version 10.10.0.19:

Defect	Title	Description
<b>DF-0915</b>	Issues with links in description field on web.	If you would insert a link on pre-written text (ctrl+L), the text would not appear as a link on web. This has been fixed so links are displayed the same regardless of creation.
<b>DF-0929</b>	Saving a diagram as SVG cannot show special characters.	SVG can now show special characters.
<b>DF-0930</b>	Certain Generic Queries cannot be displayed on HTMLContentTabs.	These are now displayed as expected.
<b>DF-0939</b>	Saving a QualiWare standard report as RTF creates a watermark on every page.	This no longer makes watermarks.
<b>DF-0953</b>	Association:ArchitMate relationship between value and realization:ArchiMate behaving unexpectedly.	Expected behavior has been implemented correctly now.
<b>DF-0965</b>	Group objects turn white instead of transparent in QWM (QualiWare Web Modeler).	Changing the opacity of a Group object in QWM would make it whiter, instead of more transparent. Opacity now functions correctly.
<b>DF-0969</b>	EDGY: Template "content", "asset" and "channel" are not available out of the box.	These have now been added (with full EDGY graph syntax).
<b>DF-0975</b>	"All responsibilities" not loading properly after changing role.	This now shows correctly after a role change.
<b>DF-0977</b>	External Document references in Descriptions don't update.	Reference to External Documents from Description fields do not update if the

		External Documents name is changed. This now updates correctly.
<b>DF-0978</b>	Cloud Architecture has issues with Graph syntax – missing icons and wrong names of templates.	Graph syntax and several of the visuals have been updated for Cloud Architecture.
<b>DF-0981</b>	Business Processes border color changes to white from QWM.	Business Processes now correctly get the selected border color displayed in QWM.
<b>DF-0984</b>	HasITSupport vs HasItSupport	HasITSupport was spelled differently in different objects, now it's spelled the same.
<b>DF-0985</b>	Missing metalink information on Information Systems.	The missing metalinks have been added to Information Systems.
<b>DF-0986</b>	Missing metalink information on Strategy.	The missing metalinks have been added to Strategy.
<b>DF-0989</b>	Default date format is not respected if attribute value is yyyy-MM-dd.	A change has been implemented that allows for more accurate date-formats.
<b>DF-0995</b>	Opening Qualihelp from QWM forces an error when drawing connections.	Qualihelp no longer causes any errors.
<b>DF-0998</b>	GWE warning window “continue” button does not work.	Continue button now works as intended.
<b>DF-1014</b>	“Send publishing request” shows Private Workspace diagram in base configuration.	Under specific circumstances, “Send publishing request” would publish a Private Workspace diagram in the base configuration. This occurred due to a bug that has been corrected.
<b>DF-1015</b>	External Document JumpOnSingleLink sometimes cause an error in path.	This path error has been corrected.
<b>DF-1018</b>	HTMLDashboard settings reset everytime QLM is restarted.	These settings now persist (assuming they've been saved) even if QLM is closed.
<b>DF-1023</b>	InformationFlows are deleted when opening certain diagrams in QWM.	The InformationFlows now remain in QWM as intended.
<b>DF-1024</b>	ContainedIn field is empty in HTMLTile.	This now contains data as expected.
<b>DF-1025</b>	QSQL Topological sorting on reused symbols throws exception.	The topological sort now returns the expected data.
<b>DF-1026</b>	Missing link to attribute for “Concept” template.	Concept's description attribute link is absent when viewed from other sources i.e. QueryDesigns. Attribute is now added.
<b>DF-1029</b>	Characters ‘æøå’ in exported PDF from spreadsheet do not display correctly.	These are now displayed as expected.
<b>DF-1033</b>	Colors of a People symbol on a Business Eco System cannot be changed more than once.	Option to edit the symbol has been corrected.
<b>DF-1034</b>	‘&’ character in name for document structure prints, causes “file not found”.	This has been corrected.

<b>DF-1037</b>	HTMLContentBox in classic view fails to load data when object does not exist in current configuration	Content box now loads data regardless of configuration, but only shows data that is supposed to be seen – e.g. Base can't see Private Workspace data.
<b>DF-1040</b>	Ampersand in title displays incorrectly on web.	This now displays as expected.
<b>DF-1041</b>	Certain ArchiMate viewpoints are not included in standard Governance Workflows.	These have now been added.
<b>DF-1046</b>	Content boxes sometimes show content from Base configuration in private workspace.	Content boxes now have correct content and links that act correctly.
<b>DF-1047</b>	Text is not properly aligned on Note objects created in QWM.	This has been adjusted to better align on notes.
<b>DF-1048</b>	Dashboard: Hover (mouse over) effect doesn't work as expected for activities.	Hover now works as expected on activities.
<b>DF-1049</b>	Business Processes change form/shape after color change in QWM.	These no longer change their shape if color is changed.
<b>DF-1054</b>	Business Capabilities – Icon's behaving unexpected.	Icons now behave as expected.
<b>DF-1056</b>	Zooming in on a diagram in QWM sometimes prevents connections from being drawn between objects.	This has been fixed so connections can be drawn when zoomed in.
<b>DF-1059</b>	'Export publisher' exporting more data than intended.	This now only exports the publisher and it's settings.
<b>DF-1065</b>	Links inserted on Notes from QWM cannot be displayed.	Links on notes are now displayed correctly when inserted from QWM.
<b>DF-1066</b>	Yellow warning label does not appear on web when it should – i.e. When trying to open a document that no longer exists.	Yellow warning label now appears when relevant.
<b>DF-1067</b>	Certain ArchiMate symbols are not displayed correctly.	These are now displayed as expected.
<b>DF-1069</b>	Highlight: "Symbol valid-to < 30 days" Dashboard item doesn't consider revisions.	This has been fixed to include correct objects/symbols despite revisions.
<b>DF-1072</b>	Label given to an object on a HTMLMegaMenu Item is not shown correctly when viewed on the web.	Labels have been adjusted to show as expected.
<b>DF-1081</b>	Images added via web are not working correctly in various aspects of the software.	The way QualiWare reads SVG's has been updated to prevent this.
<b>DF-1086</b>	Diagram navigation buttons are broken.	These now work as expected.
<b>DF-1087</b>	"Create label" not translated under specific circumstances.	"Create label" is now translated as expected.

<b>DF-1089</b>	QRV: Not possible to filter objects from a Remote Repository.	These can now be filtered as expected.
<b>DF-1090</b>	Deliverable:ArchiMate inconsistencies in connctions design.	Connections are now drawn correctly.
<b>DF-1091</b>	In QRV settings a "<>" separator wrongfully appears in plain text.	This has been corrected.
<b>DF-1092</b>	Embedded content on Activities breaks.	Embedded content on Activities sometimes shows errors or just looks completely different in general. The content now looks more in-line with what's been added in the object.
<b>DF-1093</b>	Images in Note Description sometimes cause an error in QWM.	This occurred if image size was too big, which has now been accounted for.
<b>DF-1097</b>	When zooming out in the browser while using QWM, a large un-interactable section will appear towards the bottom.	QWM Canvas has been expanded so it will always be visible, even upon zooming out.
<b>DF-1100</b>	Coloring a note object only appears in QWM.	Coloring of note objects can now be seen from all views.
<b>DF-1104</b>	ACL settings are not saved visually.	Checkmarks now visually show saved settings for ACL.
<b>DF-1105</b>	When printing the diagram in a Report Definition, the diagram comes out blurry and in low resolution.	A fix has been implemented so diagram is shown in a better resolution.
<b>DF-1110</b>	Cannot open QDM-files containing international characters.	This has been fixed so they can be opened regardless of characters used.
<b>DF-1122</b>	Arrowhead disappears on ConversationLink connection in QWM.	Arrowhead now remains in QWM.
<b>DF-1124</b>	Cannot link a Capability to Strategic Alignment.	These can now be linked/associated.
<b>DF-1127</b>	Recalculating licenses stops if one of the licenses exceeds the limit.	The recalculation no longer stops if a license type exceeds the limit.
<b>DF-1131</b>	Business Process symbol inconsistency within QWM.	Business Process symbols are now more consistent when using QWM.
<b>DF-1132</b>	When a hyperlink name added from QLM is changed in QWM, it does not update.	This now updates as expected.
<b>DF-1135</b>	ArchiMate icons will not save custom symbol properties.	These can now be saved with custom properties.
<b>DF-1140</b>	Refreshing page on a diagram sometimes causes a blank screen.	Refreshing now reloads the displayed content as expected.
<b>DF-1141</b>	Explorer in QWM goes blank if you change diagram with multiple tabs open.	This now displays the expected properties for the currently selected diagram.
<b>DF-1144</b>	When zooming in/out in QWM, keyboard shortcuts stop working.	Keyboard shortcuts now work regardless of zoom level.

<b>DF-1146</b>	Competence Management: ExtendAll “Extend” button is re-clickable.	This now grays out.
<b>DF-1147</b>	Butpans on Organization Units will sometimes show a gray square, instead of the intended icon.	The icons now show properly.
<b>DF-1155</b>	Business Capability Models have different views/looks in QWM, QLM and from web diagram page.	These are now more similar across the board.
<b>DF-1163</b>	Capability symbol cannot be adjusted in QWM, if zoomed out.	Symbol now behaves as expected in QWM, no matter the zoom level.
<b>DF-1171</b>	Pasting copied text into a description with existing text adds unreasonable line breaks.	Text is now pasted in normally.
<b>DF-1181</b>	Clicking a link to an internal QualiWare object/diagram always opens it in Base configuration.	Now opens in the configuration you click it from (if possible).
<b>DF-1184</b>	Scrollbar doesn’t appear on content that is too long for IFrame.	Scrollbar now appears correctly.
<b>DF-1185</b>	Cloud Architecture Diagram missing owner and responsible properties.	These have now been added.
<b>DF-1188</b>	Character ‘Ø’ may cause QEP crash.	A fix has been implanted so it no longer causes a crash.
<b>DF-1192</b>	PDF External Documents become unreadable if Media Type is selected.	This has been fixed so PDF documents are read normally regardless of selected media type.
<b>DF-1195</b>	Only truncated short descriptions are present in export from Spreadsheet.	Full short descriptions are now available from exports.
<b>DF-1198</b>	Issue with sorting on out-of-the-box “Object Linked data” query.	This occurred due to an error in the executed query, which has been corrected.
<b>DF-1199</b>	Creating custom Repository Explorer causes error when a folder displays no content.	This was due to an error, which has been found and corrected.
<b>DF-1201</b>	Out-of-the-box Query Design causes error when attempting to filter in Query Result Views (QRV).	The way QueryDesign reads data has been adjusted to fix this.
<b>DF-1205</b>	Swedish characters do not work in Datagrid column names.	Swedish characters are now supported in Datagrid column names.
<b>DF-1206</b>	Datagrid filtering does not work as intended.	Bug that has been corrected.
<b>DF-1207</b>	Popup “GWEButtons” container is set to show by default, even if no buttons are usable.	This is no longer set to show by default.

<b>DF-1210</b>	Custom made buttons (i.e. in QRV's) do not show tooltips.	These now show tooltips.
<b>DF-1211</b>	Symbols in QWM are stuck on resized properties and not reverting globally.	A change has been implemented to fix this.
<b>DF-1212</b>	Left query view of e.g. documents, fails if just one is in a different configuration.	The query that is executed to run this has been corrected.
<b>DF-1215</b>	Date format is not correct in "My To-Do list"	Date format has been corrected in this.
<b>DF-1216</b>	Issues with font size and type when edited from QWM.	This has been corrected so the font type and size changes as expected from QWM.
<b>DF-1219</b>	QualiWareSetup defaults to username rather than LOGIN.	This now looks for login.
<b>DF-1221</b>	Diagrams created through QWM, behave differently in QLM when it comes to 'snapping' objects to the grid (ctrl+G in QLM).	These now behave the same in QWM and QLM.
<b>DF-1225</b>	DC-Get-UrlTableFromContainedIn does not return a value.	This was due to a missing parameter that has now been added correctly.
<b>DF-1229</b>	Social Behavior Warehouse (SBW) initial object creation shows wrong data, as it counts entries from both 'read' and 'edit'.	A change has been made to only include "Read" activity, meaning the data should look more like what's expected.
<b>DF-1239</b>	SCIM issue with groups not updating (synchronizing) properly.	Cause has been found and corrected.
<b>DF-1252</b>	SBW - Repository sync has timeouts - status of sync becomes unknown.	A fix has been implemented. SBW synchronization methods were reimplemented to be invoked through Async call service.
<b>DF-1253</b>	"Link item" links cannot change color, size or font.	Can now change color, size and font like any other links.
<b>DF-1260</b>	Default documents found in the Document desktop are expired.	These documents have been adjusted.
<b>DF-1267</b>	In QWM if you select an object to drag and drop, cursor may sometimes accidentally mark everything while dragging.	A fix has been implemented that prevents this.
<b>DF-1269</b>	QEF Log export limits/truncates log entries even if log size limit isn't overwritten.	QEF Log exports now show in full if within the log size limit.
